CSE110: Programming Language I Duration: 25 minutes Marks: 10

Name: (Please write in CAPITAL LETTERS)	ID:	Section: 38

1. Suppose you are given a list of either numbers or characters. Write a python function **element_search** which will take an element from the user and the given list as arguments and check how many times the element appears in the list. Print the output outside the function. You are not allowed to use the built-in count() function. [You need to check if the items of the list are numbers or characters]
