CSE110: Programming Language I Duration: 25 minutes Marks: 10

Name: (Please write in CAPITAL LETTERS)	ID:	Section: 30

1. Write a python function called **area_calculator** which will take two arguments the length and width from the user. You have to check whether the value of length and width are equal or not; if yes, then take it as a unit length value of a square and calculate the area. Otherwise, calculate the area of a triangle using the values and return the area.
