BRAC UNIVERSITY

Quiz 2 **Department of Computer Science and Engineering** **SET C**

CSE110: Programming Language I Duration: 35 minutes Marks: 20

Name: (Please write in CAPITAL LETTERS)	ID:	Section: 38

1. Write a python program that will take **a one-word string** as input from the user. Print only those characters of the string whose ASCII value is an even number. Also, print the number of characters whose ASCII value is even. [Marks 10]
[CO 3 + CO 4+ CO 6]

Sample Input 1:

Program

Sample output 1:

Even characters: Prr

Number of even ASCII value characters: 3

Explanation:

ASCII value of the characters are P - 80, r - 114, o - 111, g - 103, r - 114, a - 97, m - 109. Among all the characters, P, r, and r have even ASCII values. So the first output is Prr and the number of even characters is 3.

Sample Input 2:

WorldCup

Sample output 2:

Even characters: rldp

Number of even ASCII value characters: 4

Explanation:

ASCII values of the characters are W - 87, o - 111, r - 114, l - 108, d-100, C-67, u -117, p-112. r, l, d, and p have even ASCII values among the characters. So the first output is rldp and the number of even characters is 4.

2. Trace the below table. You MUST show the trace table. [Marks 10]
[CO 3 + CO 4+ CO 6]

1	`value = ""`
2	`i, j, k = 0, 0, 15`
3	`while i< 5:`
4	`    k-=1`
5	`    j = k`
6	`    while j > 11:`
7	`        if (j % 2) != 0:`
8	`            value = str(i) + "-->" + str(int(j / 3))`
9	`        else:`
10	`            value = "-->" + str(int(i / 5)) + str(value) + str(j)`
11	`        print(value)`
12	`        j = j-1`
13	`    i+=1`
14	`print(value == '-->01-->412')`
15	`print(int(8.9)/2+3*5)`
16	`print(True and False or not False)`
17	`print(True == 'True')`
