BRAC UNIVERSITY

Quiz 2 **Department of Computer Science and Engineering** **SET F**

CSE110: Programming Language I Duration: 35 minutes Marks: 20

Name: (Please write in CAPITAL LETTERS)	ID:	Section: 42

1. Write a python program that will at first take **exactly one word** from the user containing both upper and lowercase letters as input. [Assume that the user will always give an input containing only uppercase and lowercase letters]. If the length of the word is even then it will print the uppercase characters. Otherwise, print 'Length is odd'.

[Marks 10]

[CO 3 + CO 4 + CO 6]

Sample Input 1:

PaliNDROme

Sample output 1:

P

N

D

R

O

Explanation:

The length of the word 'PaliNDROme' is 10 which is even. So, the uppercase letters P, N, D, R, and O are printed.

Sample Input 2:

ClasS

Sample output 2:

Length is odd

Explanation:

The length of the word 'ClasS' is 5 which is odd. So the output is 'Length is odd'.

2. Trace the below table. You MUST show the trace table. [Marks 10]
[CO 3 + CO 4 + CO 6]

1	`value = ""`
2	`i, j, k = 1, 1, 15`
3	`while i< 5:`
4	`    k-=1`
5	`    j = k`
6	`    while j > 11:`
7	`        if (j % 2) == 0:`
8	`            value = str(i) + "-->" + str(int(j / 3))`
9	`        else:`
10	`            value = "-->" + str(int(i / 3)) + str(value) + str(j)`
11	`        print(value)`
12	`        j = j-1`
13	`    i+=1`
14	`print(value[1:4])`
15	`print(int(8.9)//3+4*2)`
16	`print(True and (len(value)== 5))`
17	`print(len(value))`
